

# SUNFRAME

**SUNFRAME** is a shared rail system with gap-free rows that boasts a sleek, low profile design. The refined aesthetics are valued by discerning homeowners and architects for residential and light commercial applications. Our system is compatible with many attachment options, including Unirac standoffs for installation on comp shingle or tile roofs. Modules are fully supported between shared rails, allowing for a streamlined install to achieve a seamless, refined look.

**SLEEK • LOW PROFILE DESIGN**

# SUNFRAME

## AESTHETIC DESIGN MADE TO FIT YOUR ROOF

SUNFRAME is compatible with many attachment options, including Unirac made standoffs for installation on comp shingle or tile roofs. Modules are supported between SUNFRAME shared rails, not on top of them. This allows the array to install lower to the roof, enhancing its integrated appearance with gap-free rows and no protrusions visible from the side. Clear or dark finish components match module frames and visually blend the array seamlessly into your roof.

## AVAILABILITY NATIONWIDE NETWORK

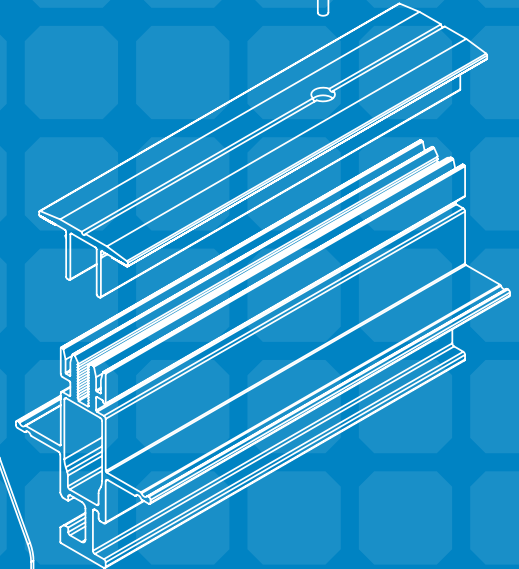

Unirac maintains the largest network of stocking distributors for our racking solutions. Our partners have distinguished their level of customer support, availability, and overall value, thereby providing the highest level of service to users of Unirac products. Count on our partners for fast and accurate delivery to meet your project needs. Visit Unirac.com for a list of distributors.

## AUTOMATED DESIGN TOOL DESIGN PLATFORM AT YOUR SERVICE

Creating a bill of materials is just a few clicks away with U-Builder, a powerful online tool that streamlines the process of designing a code compliant solar mounting system. Save time by creating a user profile, and recall preferences and projects automatically when you log in. You will enjoy the ability to share projects with customers; there's no need to print results and send to a distributor, just click and share.
