Introducing the EG4 280Ah WallMount All Weather Conduit Box Stride

The EG4 280Ah WallMount All Weather Conduit Box Stride allows you to neatly manage your wires and communication cables in a parallel configuration, allowing for a much neater installation. This conduit box can also help keep your inverters level and batteries spaced correctly. It pairs well with two EG4 280Ah WallMount All Weather Batteries and EG4 FlexBOSS inverters.

Additionally, the conduit box is a great way to pair an inverter with the GridBOSS, as the knockouts are appropriately sized to handle a wide array of outdoor installation configurations.

Works with the 280Ah WallMount All Weather Battery, FlexBOSS21, FlexBOSS18, 18kPV, 12kPV, GridBOSS

Dimensions:

59 ½in width x 9in depth x 9in height
