

## EJOT® Aluminum Roof Hook

The mounting solution for PV installations on tile roofs

- ✓ Secure installation in the rafter
- ✓ Fast and cost-effective
- ✓ Superior load bearing capacity
- ✓ With additional sealing device underneath the base plate

# EJOT® Aluminum Roof Hook

The mounting solution for PV installations on tile roofs.

#### Superior sealing

1. Sealing element underneath base plate

#### Superior sealing

2. Fastener with additional sealing ring

#### Extremely stiff

to minimize bending under load and the risk of tile cracking

- ✓ Special design for direct installation of any 2 rail system without L-Feet, which works with all major mounting systems.
- ✓ Comes complete with fixing kit:  
Stainless Steel Flat Head Screws #14 (6mm)
- ✓ Preassembled with innovative sealing feature for leakage free installation on wood batten constructions
- ✓ Very light aluminum diecast product

#### Characteristics

- Complete Kit including Fasteners and additional sealing features
- No predrilling needed
- Base plate with offset hole positions to avoid splitting the wood grain
- Specifically adopted for superior sealing in combination with tile roofs using a batten system
- Additional sealing features avoid water penetration between underlayment and baseplate
- Amazingly low weight
- Extremely stiff to minimize bending under load and the risk of tile cracking
